## DETAILED ACTION

### *Election/Restrictions*

Newly submitted claims 26-32 and 33-39 are directed to an invention that is independent or distinct from the invention *originally claimed* for the following reasons:

Restriction to one of the following inventions is made under 35 U.S.C. 121:

- I. Claims 26-32 (newly claimed), drawn to machine-implemented method, classified in class 271, subclass 206.
- II. Claims 33-39 (newly claimed), drawn to a document stacker apparatus, classified in class 271, subclass 206.
- III. Claim 1 (and Claims 2-6, 8-9, and 11-12) of the claims originally filed, drawn to a method for use in connection with a document stacker comprising an actuator, classified in class 271, subclass 206.
- IV. Claim 14 (and Claims 15-19 and 22-24) of the claims originally filed, drawn to a document stacker apparatus, classified in class 271, subclass 206.

The inventions are distinct, each from the other because of the following reasons:

Inventions I & II and III & IV are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed

does not require the particulars of the subcombination as claimed because the subcombination could measure a jam (go/no go event). The subcombination has separate utility such as measuring a continuum of data.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 26-32 and 33-39 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Further, Inventions II & IV and I & III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the process for using the product as claimed can be practiced with another materially different product.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species of invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
